Developer with strong knowledge of Fullstack Development technologies

Skills

<i>Front End</i>	<i>Back End</i>	<i>Source Control</i>	<i>Frameworks</i>
HTML/CSS	Node	Git	React
Javascript	Express		
	SQL		
	MongoDB		

Projects

Google Books Search *MongoDB / Express / Node / React*

- Front End: Made in React, the user is able to search for a book from the Google Books API.
- Back End: The user can then save the book to a Mongo database, as well as access and delete saved material.

Weather Dashboard *JQuery / AJAX / Local Storage*

- Front End: The user can search for the current and 5 day forecast for cities using the Open Weather API. Upon reloading the app, the user is shown the current and 5 day forecast of the last search.
-

Education

Rutgers Coding Bootcamp *2020*

Montclair State University *B.S. Exercise Physiology / 2013 - 2018*
