---

# Skills

| *Front End* | *Back End* | *Source Control* | *Frameworks* |
|---|---|---|---|
| HTML/CSS | Node | Git | React |
| Javascript | Express | | |
| Bootstrap | SQL | | |
| Material-UI | MongoDB | | |

---

# Projects

### D'scuss

*https://d-scuss.herokuapp.com/* | *https://github.com/Dfellner92/D-scuss*

**Team of 2, my role:** *Building the back-end of our interactive-multi user blog, I designed the database using Mongoose and Robo3T. Each signup created an object in my collection, from where blog posts could be added, updated, and deleted from each user's array. The search feature allows other users blog posts to be read with update and delete capabilities disabled.*

- MongoDB, Express, React, Node, Firebase, Material-UI, Local Storage

### Weather Dashboard

*https://dfellner92.github.io/weatherDashboard/* | *https://github.com/Dfellner92/weatherDashboard*

*The user can search for the current and 5 day forecast for cities using the Open Weather API. Upon refreshing the app, the user is shown the current and 5 day forecast of the last search.*

- JQuery, AJAX, Local Storage

# Education

**Rutgers School of Continuing Studies** *2020*

*Certificate in Full Stack Web Development*

**Montclair State University**

*B.S. Exercise Physiology*

---
